Computational Biology

Post-Doctoral Research Fellow

Department of Biostatistics, Harvard School of Public Health
Department of Biostatistics and Computational Biology, Dana-Farber Cancer Institute

The Harvard School of Public Health and the Dana-Farber Cancer Institute invite applications for a post-doctoral research fellow position. The research fellow will work on the development and application of statistical methods for large population-based cancer studies. Potential methodological areas are longitudinal data analysis, survival analysis, modern multivariate statistical analysis, cure models and measurement error modeling. Potential areas of application are cancer prevention trials, health disparities and cancer surveillance. All the projects are funded by an NCI grant.

A Ph.D. in statistics, biostatistics, mathematics or a related quantitative field is required. Additional qualifications are programming experience in R, as well as excellent written and oral communication skills. The position will be supervised by Dr. Yi Li, to whom informal inquires can be addressed (yili@jimmy.harvard.edu).

To apply, please send CV and cover letter describing research interests and interest in the position, and arrange for three reference letters to be sent to yili@jimmy.harvard.edu, or by regular mail to
