

# MEMORIAL SLOAN-KETTERING CANCER CENTER

## Masters Level Biostatisticians

Memorial Sloan-Kettering Cancer Center has positions available for masters level biostatisticians. The successful applicant will engage in a wide variety of collaborative projects with medical investigators and statisticians. Projects involve the design, analysis and publication of clinical, laboratory or cancer prevention research.

Qualifications include a masters degree in biostatistics or statistics, excellent programming skills, proficiency in database manipulation, and good verbal and written communication skills.
