

University of Rochester  
Master's Level Biostatistician

The Department of Biostatistics and Computational Biology at the University of Rochester seeks a Master's level biostatistician to collaborate with investigators in Environmental Medicine and Biostatistics. Responsibilities include data analysis such as making scatterplots, running univariate descriptive statistics, fitting generalized linear models, checking model assumptions, and creating summary tables.

Requirements: A demonstrated ability to implement data analysis and clearly present statistical methods, results, and conclusions. Strong computing skills that ensure accurate and reproducible results. Knowledge of SAS and/or R is required.

The position is available for 12 months initially with possibility of renewal by mutual agreement.

Please send resume and three references to:
