

## Postdoctoral Research Position in Cancer Screening

---

### Description:

Postdoctoral Research Fellow position in Biostatistics is available at Dana-Farber Cancer Institute and Harvard School of Public Health. The work will involve stochastic modeling for early detection of disease. This work deals with extending and applying the current models for new breast cancer screening modalities. The relevant previous work includes: Lee and Zelen (Biometrics, 2008; JNCI 2006) and Shen and Zelen (Biostatistics, 2005). Candidates with strong mathematics / statistics / biostatistics background are encouraged to apply. One-year term and renewable for the second year. The appointment can start as soon as possible.

### Additional Information:

Please email CV and names of three references to Sandra Lee ([sjlee@jimmy.harvard.edu](mailto:sjlee@jimmy.harvard.edu)).

Applications from minority and female candidates are especially encouraged. Harvard University is an AA/EOE.
