

Mathematics and Computer Science: Statistics – Assistant Professor

The University of Richmond, a highly selective, private, liberal arts undergraduate institution, invites applications for a full-time, tenure-track position at the assistant professor level in Statistics or Biostatistics, beginning in Fall 2010.

Candidates should be able to teach undergraduate courses in statistics at both the introductory and advanced level. The department is interested in candidates who can both support and grow the department's statistical curriculum. The department is open to all areas of specialization. Applicants must have received their Ph.D. by August 2010.

Applicants should apply online at <http://www.urjobs.org> using the Faculty (Instructional/Research) link. Applicants will be asked to supply electronically a letter of application, a curriculum vitae, statement on teaching philosophy and experience, and a statement describing the applicant's research agenda. Applicants should arrange for graduate transcripts and three letters of recommendation, including at least one that addresses teaching effectiveness and potential, to be sent electronically to egeiger@richmond.edu or via regular mail to Chair, Statistics Search Committee, Department of Mathematics and Computer Science, University of Richmond, VA 23173. Applications will be reviewed beginning December 10, 2009, and will be accepted until the position is filled.

The University of Richmond is committed to developing a diverse workforce and student body and to being an inclusive community. We strongly encourage applications from candidates who will contribute to these goals. For more information on the department, resources, and teaching assignment, see (<http://www.mathcs.richmond.edu/>).
