The Center of Biostatistics and Bioinformatics at the University of Mississippi Medical Center has an immediate opening for a tenure track position at the rank of Associate Professor.

Successful applicants will have the skills and experience to maintain productive research record through active collaboration and grant supported methodological research.

Qualifications include a doctorate in biostatistics, statistics or bioinformatics, a strong commitment to collaborative research and education, as well as excellent oral and written communication skills.

Responsibilities include:

- Provide biostatistics expertise in study design and statistical analytical planning;
- Assist in preparation of grant applications and research publications;
- Consult with clinical, basic and translational scientists involved in clinical trials, population-based epidemiologic studies, and laboratory investigations;
- Provide training (workshops, presentations, and tutorials) to investigators and members of their research groups;
- Conduct research on statistical and methodological issues associated with biomedicine and biobehavioral health;
- Conduct courses or seminars;
- Serve as academic advisors to students;
- Supervise independent study activities such as practicum and internships;
- Serve on University committees as assigned;
- Render service to the professional or lay community which is relevant to the individual's academic specialty;
- Participate in curriculum development activities including the development of curricular materials and special instructional methods;
- Perform other scholarly activities

Send CV, description of research experience and three references to Search Committee, c/o Sondra Redmont (sredmont@umc.edu). The University of Mississippi Medical Center is an EOE, M/F/D/V.
