Non-tenure Research Assistant Professor Position

Virginia Commonwealth University invites applications for a non-tenure research associate professor position in Statistical Genetics. Incumbent will work at the Center for Biomarker Research and Precision Medicine in the School of Pharmacy of Virginia Commonwealth University (VCU) directed by Dr. Van den Oord.

Ph.D. in statistics, mathematics, or a related field is required. Preference will be given to candidates with expertise in next generation sequencing studies in general and the use of this technology in the context of methylation studies in specific. Applicants should also have an established publication record of implementing novel statistical approaches in user-friendly software packages. Affinity with the study of psychiatric outcomes is desirable. Familiarity with statistical programming in R and C/C++ is important.

The candidate will need to be able to work in a highly multidisciplinary and interactive environment involving multiple external collaborators. As the candidate is expected to maintain and expand the Center’s research mission, preference will be given to candidates with interest in and a track record of obtaining grant funding.

“Virginia Commonwealth University is an equal opportunity, Affirmative Action University providing access to education and employment without regard to age, race, color, national origin, gender, religion, sexual orientation, veteran’s status, political affiliation or disability”.

All interested applicants should email a cover letter, curriculum vitae, research statement, and three references to: Gioia Casso gncasso@vcu.edu. VCU is an equal opportunity/affirmative action employer. Women, minorities, and persons with disabilities encouraged to apply.
