The National Agricultural Statistics Service (NASS) is the data collection and dissemination arm of the U.S. Department of Agriculture. NASS gathers and publishes a vast array of information on every facet of U.S. agriculture, including production, economics, demographics, and the environment. We are looking to fill several Mathematical Statistician positions in our Methodology Division and Research and Development Division in the Washington DC Metro Area from entry level (GS-9) to experienced level (GS-13). Please see the link below on USAjobs.gov for more information and to apply. The job announcement closes on April 29th, 2015.
