Lead Social Services Research Manager

**In this role, your responsibilities will include:**

- Conduct sound scientific research studies that evaluate the need, demand, use and outcomes of DSHS services
- Carry out rigorous, advanced and policy-relevant research at an advanced level of expertise
- In concert with analytical programmers, produce ad hoc queries and data reports in SAS programming language
- Conduct analyses of integrated cross system data bases to estimate impacts of specific programs and interventions
- Use multivariate statistical analyses to develop appropriate comparison groups for quasi-experimental designs
- Generate valid and reliable output to meet federal and state reporting requirements
- Deliver information via presentations, briefing papers, technical reports and peer-reviewed journal articles

**In order to be considered for this position, you'll need to have the following qualification:**

A Ph.D.* or equivalent in economics, public policy, sociology, demography, statistics, psychology, or related field

*A Master's degree with some documented experience conducting QUANTITATIVE, policy-relevant research may substitute for a Ph.D.
