Postdoctoral Research Position in Quantitative Sciences for Cancer Research

Description:

The Department of Biostatistics at the Harvard School of Public Health invites applications for a post-doctoral research fellow position supported by the Training Grant in Quantitative Sciences for Cancer Research. The research fellow will engage in methodological research and participate in synergistic collaborative research in cancer, with mentors chosen by mutual agreement as part of the recruitment process.

Qualifications:

A doctoral degree is required. Appropriate degrees include statistics, computer science, applied mathematics, bioinformatics, biostatistics, quantitative human genetics, quantitative epidemiology, systems biology or other fields of science relevant to computational cancer research. Interest across all applications of quantitative sciences in cancer research, including basic, population, and clinical sciences are welcome. The ideal candidate will have excellent technical and writing skills, knowledge of relevant programming languages, and an ability to collaborate across disciplines. U.S. citizenship or permanent residency required. Anticipated start date is August 2016.

Additional Information:

Interested applicants should send a letter of application indicating current and future research interests, a curriculum vitae, and names of three references. In your application, please reference “Training Grant in Quantitative Sciences for Cancer Research” and indicate any preliminary preferences for mentorship assignment. Application materials should be sent by email to biostat_postdoc@hsph.harvard.edu.

Harvard University seeks to find, develop, promote, and retain the world’s best scholars. Harvard is an Affirmative Action/Equal Opportunity Employer. Applications from women and minority candidates are strongly encouraged.
