**Description:**

A short term Postdoctoral Research Fellow position in neurostatistics is available at Harvard T.H. Chan School of Public Health. This position involves developing statistical methods for analyzing neurologic disease studies, including several exciting Alzheimer's disease studies. We seek an individual with strong interests in statistical methods, particularly survival analysis methods and biomarker analyses methods, and a strong interest in collaborative biomedical research. The work will involve both methodological research with department faculty and collaboration with clinical investigators.

**Qualifications:**

Ph.D. in statistics or biostatistics with strong quantitative research background, statistical and programming proficiency, as well as good written and oral communication skills.

**Additional Information:**

Scientific questions regarding this position can be sent to Rebecca Betensky at betensky@hsph.harvard.edu. To apply, send cover letter describing your research interests and interest in the position, with CV and names of three references. In your application, please reference "Betensky Neurostats Postdoc." Application materials should be sent by email (preferred) to biostat_postdoc@hsph.harvard.edu, or mail to: Postdoc Search, c/o Vickie Beaulieu, Department of Biostatistics, Harvard T.H. Chan School of Public Health, 655 Huntington Avenue, Building 2, 4th Floor, Boston MA 02115.

Applications from minority and female candidates are especially encouraged. Harvard University is an AA/EOE.
