Position Title:
Nonclinical (CMC) Biostatistician Summer Intern

Description:
Seattle Genetics summer internship program is designed to offer opportunities to students who are interested in exploring the biotech industry and building their scientific skills.

The process development and manufacturing group at Seattle Genetics is seeking a nonclinical (CMC) biostatistics intern. The internship is intended to give the incumbent opportunity to interface and consult with a variety of scientists across development and manufacturing. Tasks include designing experiments, analyzing data, and applying statistical thinking to improve analytical methods, formulations, and/or processes. The student will be mentored by an experienced PhD CMC biostatistician during the 10- to 12-week internship. Internships will take place at Seattle Genetics headquarters in Bothell, WA. This position is paid and is not for academic credit.

Basic Qualifications:

- Must be in the process of earning a MS or PhD in biostatistics or statistics and completed at least two semesters of graduate coursework by spring 2015

Preferred Qualifications:

- Coursework and experience using design of experiments, statistical process control, or multivariate analysis
- Familiarity with JMP

If you are passionate about statistics and the possibility of making a real difference in the lives of people with cancer, we encourage you to send us your resume and a brief cover letter.
