Post-Doctoral Fellowship

A postdoctoral fellowship is available in joint modeling within the University of Pennsylvania Division of Biostatistics. This is an NIH R01 supported position to develop statistical methodology in joint modeling of longitudinal, time-to-event and functional data; under the direction of Drs. Wensheng Guo and Sarah Ratcliffe. The position will involve both theoretical development as well as extensive programming and analysis of large datasets, preferably in Matlab. Experience in nonparametric inference, longitudinal data analysis and survival analysis preferred. Applicants should have a Ph.D. in statistics or biostatistics. This is a two year position starting January 1, 2016.

Applications, including cover letter, CV, and three letters of reference, should be sent by e-mail to Dr. Sarah Ratcliffe <sratclif at upenn.edu>. Please indicate Postdoc application in subject line.
