**Position Summary:** The Department of Biostatistics at the University of Kansas Medical Center is recruiting an open track and open rank faculty member who will be responsible for collaborative research, independent research, teaching and mentoring. This is an open level position and level of appointment will be based upon experience and accomplishments. The department consists of 13 Ph.D. statisticians, 3 teaching associates and 12 staff members that include masters level statisticians, information systems personnel and the administrative personnel. The department also has extensive graduate programs with over 50 students across these programs. Expertise within the department includes linear, nonlinear, and longitudinal modeling, clinical trial and experimental design, survival analysis, categorical data analysis, add omics and Bayesian methodology.

**Key Roles and Responsibilities:**
- Assist in the development and continued growth of the Department of Biostatistics.
- Provide statistical design and analysis support to investigators on research projects.
- Prepare statistical analysis sections for grants, manuscript publications and meeting presentations.
- Supervise and mentor master level statisticians or direct them on related projects, for which they provide the PhD statistician with programming support.
- Teach in the departments graduate degree programs or other graduate courses provided by the department to the institution.
- Mentor and advise students including serving on dissertation committees.

**Qualifications:** Ph.D. in Biostatistics, statistics or related area. Ability to effectively interact with University and Health Center personnel, scientists, educators and students. Candidates must have the ability to work cooperatively and collegially within a diverse environment and who will create a positive and collaborative atmosphere for achieving success. Excellent written and verbal communication abilities.

**Preferred Qualifications:** Preference will be given to individuals with experience in obtaining extramural grant funding as a primary or co-investigator.

Applications should include: cover letter; CV; names and contact information for three references qualified to evaluate your professional experiences and skill.
