The Division of Biostatistics at the Medical College of Wisconsin is seeking to fill a tenure-track faculty position at the level of Assistant or Associate Professor, for someone with expertise in statistical genetics, bioinformatics, or big data methods. Primary responsibilities include teaching and mentoring graduate students, conducting methodological research, and engaging in collaborative research with physical and medical scientists, especially those engaged in genetics research. The position begins July 1, 2017 or earlier if available.

The Medical College of Wisconsin (MCW) is a private free-standing medical school located in suburban Milwaukee. It has a Graduate School of Biomedical Sciences and offers a Ph.D. in Biostatistics. The Division of Biostatistics, located in the Institute of Health and Society, has 13 faculty members. They are involved in a number of large collaborative projects including the Center for International Blood Marrow Transplant Research, MCW Cancer Center and the Center for Patient Care and Outcomes Research. The Division also has a Biostatistical Consulting Service which supports research across all disciplines at the College. All these activities offer a number of opportunities for collaborative research as well as methodological research that typically stems from it.

Candidates must hold a Ph.D. in Biostatistics or Statistics, or expect to complete such a degree. Applicants should demonstrate methodological and applied expertise, and have skills in modern statistical computing. Excellent written and oral communication skills are also essential. Experience and/or interest in teaching theoretical and applied biostatistics courses are expected.

To apply, email a cover letter describing your interest in the position and qualifications, CV, research statement, graduate transcripts and three reference letters to tcargile@mcw.edu.
