Senior Staff Analyst UCSF HDF Comprehensive Cancer Center Biostatistics Core

Description:

The UCSF Helen Diller Family Comprehensive Cancer Center (HDFCCC) Biostatistics Core at the University of California San Francisco (UCSF) is seeking a senior staff analyst candidate with the earliest possible starting date of February 1, 2017. Position involves development of causal inference methodologies with application in big data driven comparative effectiveness research and collaborative research through the Helen Diller Family Comprehensive Cancer Center.

Qualifications:

We are seeking an independent, results and detailed oriented individual with experience planning long-term statistical studies, including the preparation of proposals, design of survey instruments and determining sampling procedures.

MS degree in Statistics, Biostatistics, or a related field; Proficient with SAS, STATA or R; experience with clinical trials and analyses of large cohort data, excellent communication and writing skills desired.

Additional Information:

The UCSF Helen Diller Family Comprehensive Cancer Center (HDFCCC), or Cancer Center, combines basic science, clinical research, epidemiology/cancer control and patient care from throughout the University of California, San Francisco system.

UCSF is a premier medical sciences institution dedicated to promoting health worldwide through excellence in research, teaching and patient care. The School of Medicine is ranked #1 nationwide in NIH support, and UCSF is ranked annually as one of the top hospitals in the United States.

Information on resources for career development and work/life balance at UCSF can be found at [http://postdocs.ucsf.edu/incoming](http://postdocs.ucsf.edu/incoming).

Please submit your application at [http://ucsfhr.ucsf.edu/careers/](http://ucsfhr.ucsf.edu/careers/): the open position can be founded via search with the Req number 46196BR.
