Postdoctoral Position in Statistical Genetics
National Institute of Environmental Health Sciences (NIEHS)

Postdoctoral position in Biostatistics Branch of NIEHS/NIH is open for recent Ph.D. graduates with interest in development of statistical methods for analysis of complex genetic and genomic data. We are broadly interested in designing methods for discovering relationships between genetic variation and human health conditions, using computational and statistical approaches. We seek applicants with independence, creativity and excellent writing skills as evidenced by published or submitted manuscripts. Candidates should have a Ph.D. in biostatistics or related area, experience in developing statistical methods, programming skills needed for design and execution of simulation experiments, as well as experience with bioinformatic tools and analysis of genetic data.
