Work Schedule, Hours, FTE, Salary Range

****This is a Research Position****
Monday - Friday; 1.0 FTE; Salary Range: Commensurate with Experience; Location: Marquam Hill.

Functions/Duties of Position

This position plays a vital role in supporting the Biostatistics Shared Resource (BSR) of the Knight Cancer Institute. The incumbent provides biostatistical consulting services to cancer researchers, which includes pre-award and post-award projects. Pre-award projects includes protocol and grant development (e.g., study design consultation and preparing a statistical analysis plan). Post-award projects involves initial consultation, project agreement (cost estimate and project planning), data management, statistical analysis, the final project report, and manuscript preparation. This position involves a significant interaction with the client, requiring excellent and effective oral and written communication skills. For example, the incumbent must be able to explain complex statistical concepts and results to biomedical researchers with very little statistical training. The incumbent is expected to participate in general cancer center activities including attendance at the annual retreat, research program meetings and seminars. S/he is expected to learn new statistical methods and keep up with newer, cutting-edge statistical methods in cancer. The position reports directly to the Director of the Biostatistics Shared Resource (Dr. Motomi Mori).

Qualifications

Required Qualifications:

- Master’s degree with major courses in relevant field and 3 years of relevant experience, OR Bachelor's degree with major courses in field of research (or RN or allied health professional) plus current ACRP or SoCRA
certification and 3 years of relevant experience, OR Bachelor’s degree with major courses in field of research (or RN or allied health professional) and 7 years of relevant experience.

- Three years of biostatistics consulting experience in cancer research.
- Familiarity with SAS and R programming.
- Strong oral and written communication skills.
- Ability to prioritize multiple tasks at one time.
- Must have excellent communication, analytical and organizational skills: both written and verbal.
- Ability to work independently and as part of a team while being collaborative in resolving problems.
- Must be proficient with computers running Windows OS applications.
- Intermediate skills with Microsoft Office e.g. Excel, Outlook, Access, Word and PowerPoint.
- Typing 60wpm.
- Must have demonstrated excellent customer service skills both on the phone and in person.
- Must possess energy and drive to coordinate multiple projects simultaneously.
- Ability to use tact and diplomacy to maintain effective working relationships.

Preferred Qualifications:
- Master’s degree in biostatistics or statistics or other related fields (e.g., MPH with emphasis on biostatistics) or equivalent work experience in biomedical research environment.
- Five years of biostatistics consulting experience in cancer research.
- Two years of experience in biostatistics consulting and collaboration in biomedical research settings.
- Familiarity with other statistical software (e.g., STATISTICA, CART, SUDAAN).

Additional Details

OHSU is an equal opportunity, affirmative action institution. All qualified applicants will receive consideration for employment and will not be discriminated against on the basis of disability or protected veteran status. Applicants with disabilities can request reasonable accommodation by contacting the Affirmative Action and Equal Opportunity Department at 503-494-5148.

How To Apply

Apply [here](#) online. Please attach CV/Resume, cover letter and list of 3 references.
