Assistant Professor, Biostatistics (Full-time, Tenure-track)

The University of Rhode Island, Department of Pharmacy Practice, is seeking to hire an Assistant Professor specializing in the area of Biostatistics with appointment to begin of academic year 2016-2017. Candidates interested in pursuing a career of teaching, collaborative research and consulting are encouraged to apply to this position. **Note:** only electronic applications will be reviewed.

All candidates are expected to demonstrate potential in undergraduate and graduate teaching, mentoring and supervising students, conducting independent and collaborative research and obtaining internal and external research funding. In addition to developing an externally funded research program, this individual will be responsible for teaching courses across the curricula of the College of Pharmacy, the Department of Computer Science and Statistics, and the interdisciplinary Health Studies undergraduate major.

This position will contribute to the University’s Academic Health Collaborative, supporting faculty and students in advancing the University’s teaching, research and service activities across health-related disciplines.

Required qualifications include:
1. Ph.D. in Biostatistics; or Ph.D. in Statistics with at least 3 years’ experience with statistical analysis of health care data; or Ph.D. or equivalent in Health Informatics, Epidemiology or other related field with strong credentials in statistical methodology, awarded by May 2016;
2. Demonstrated proficiency in applying statistical methods to analyze health care utilization data using SAS statistical software;
3. Demonstrated evidence of successful teaching at the college level;
4. Demonstrated evidence of success in research, demonstrated by publication in peer-reviewed journals within the field, or by conference abstracts and presentations;
5. Demonstrated ability to work with diverse groups.

Preferred qualifications include: experience developing and delivering courses in biostatistics; success obtaining funding through competitive granting programs; experience conducting research involving prescription medications and/or pharmacy services; teaching and research experience involving underrepresented and underserved populations; and experience working with administrative data from commercial insurance plans and Medicaid.
