The Department of Statistical Sciences, University of Toronto, invites applications for a tenure-stream appointment in Financial Insurance. The appointment is at the rank of Associate Professor and will commence July 1, 2016.

We seek candidates with research expertise at the interface of Actuarial Science/Insurance and Statistical/Mathematical Finance. Applicants must have a PhD in Actuarial Science or Statistics or a closely related field and must demonstrate excellence in teaching and research. Candidates must demonstrate a mature research program with a sustained record of research contributions at the highest international levels expected of a leading researcher, as judged by publications in top ranked and field-relevant academic journals, invited presentations at top international conferences, research awards and accolades, and exceptional endorsements by referees of the highest international stature. Evidence for excellence in teaching will comprise positive teaching accomplishments and accolades, strong letters of reference and teaching evaluations, and a teaching dossier.

The University of Toronto is an international leader in statistical and actuarial science research and education. The successful candidate will have the ability to teach Actuarial Science and Statistical/Mathematical Finance at the undergraduate level, and Statistical/Mathematical Finance at the graduate level. They will be expected to supervise students in the Department's doctoral field in Actuarial Science and Mathematical Finance and be active in teaching and supervision in our Masters of Financial Insurance. We seek exceptional candidates who would complement our existing strengths. Successful candidates are expected to pursue independent, innovative research at the highest international level. The successful candidate is expected to have a strong commitment to undergraduate and graduate teaching, and to participate actively in the Graduate Department of Statistical Sciences.

Salary will be commensurate with qualifications and experience.

Application material for the position should be submitted online through MathJobs, http://www.mathjobs.org/jobs/jobs/8600. It should include the candidate's curriculum vitae, a list of publications, a research statement, a teaching dossier, the AMS Standard Cover Sheet, and at least four letters of reference sent directly by the writers, including at least one primarily addressing the candidate's teaching. To receive full consideration, application material should be received by April 13, 2016.

For more information, please see http://www.utstat.toronto.edu/wordpress/. If you have any questions about this position, please contact christine@utstat.utoronto.ca.

The University of Toronto offers the opportunity to teach, conduct research, and live in one of the most diverse metropolitan areas in the world.

The University of Toronto is strongly committed to diversity within its community and especially welcomes applicants from visible minority group members, women, Aboriginal
persons, persons with disabilities, members of sexual minority groups, and others who may contribute to the further diversification of ideas.

All qualified candidates are encouraged to apply; however, Canadians and permanent residents will be given priority.
