The Department of Population Medicine (DPM) of Harvard Medical School and Harvard Pilgrim Health Care Institute seeks a biostatistician to join our faculty. Responsibilities include consultation and collaboration on multidisciplinary research teams as a co-investigator/biostatistician, providing expertise in study design, statistical analysis, grant development, and manuscript preparation. The biostatistician faculty is also strongly encouraged and will be well supported to develop his/her own methodological research area. Teaching opportunities are also available. Faculty rank will be determined based on experience.

The Department is uniquely positioned as a supportive and collaborative academic department jointly sponsored by a medical school and a large, non-profit health plan. Its multi-disciplinary faculty includes health services researchers, social scientists, epidemiologists, internists, pediatricians, decision analysts, and biostatisticians. Faculty members conduct research in multiple areas including aging, cancer control, maternal and child health, health care policy, obesity prevention, medical product safety surveillance, comparative effectiveness research, and infectious disease epidemiology. The Department is also involved in several large national initiatives, such as the FDA Sentinel program, the National Patient-Centered Clinical Research Network (PCORnet), and the Health Care Systems Research Network.

Applicants must have a doctoral degree in biostatistics, statistics, or a related field. Preference will be given to applicants with a demonstrated ability to both collaborate on multidisciplinary research teams and to successfully lead their own research program with the ability or potential to obtain research grants. Candidates should have excellent verbal and written communication skills. Expertise in the application of mixed models, observational study designs and/or the analysis of large scale electronic healthcare data is preferred.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, or any other characteristic protected by law.

Women and minority candidates are especially encouraged to apply.

Send curriculum vitae, research statement, and the names of three references by email to Mildred_Portillo@harvardpilgrim.org, or submit materials to:
