The Department of Epidemiology, Biostatistics and Occupational Health, Faculty of Medicine, McGill University, invites applications for a position as an Assistant or Associate Professor of Biostatistics [Tenure Track].

Candidates must have a doctorate in statistics or biostatistics and relevant research experience in biostatistics. Necessary qualifications for the position include evidence of research productivity (peer-reviewed publications) and a strong commitment to excellence in teaching. The successful candidate will have potential and proven ability to develop an internationally recognized research program in Biostatistics, a demonstrated ability to obtain grants for his/her own research or to contribute to the building of successful research projects. Candidates must also demonstrate team spirit in developing their own research. Although we will consider all strong applicants, we are particularly interested in candidates with expertise in the areas of big data, machine learning, survival analysis and Bayesian methods.

Faculty members are expected to conduct a strong research program and to supervise graduate trainees. The successful candidate will also be required to teach graduate students in the Master’s and PhD programs, both in Biostatistics and in Epidemiology.

The initial appointment for tenure track positions at McGill is for three years with possibility of renewal. The start date will be August 1, 2017. Salary is commensurate with qualifications and experience.

McGill University is one of Canada’s leading universities, and the Department of Epidemiology, Biostatistics and Occupational Health is home to one of the largest concentration of doctoral-level biostatisticians, with internationally recognized research programmes in topics such as causal inference and statistical genetics. The Department is one of the top academic units for biomedical statistics in the world, and offers a vibrant research environment.

Please submit your application within 30 days of the publication of this advertisement at the following website: http://www.mcgill.ca/medicine-academic/positionsavailable. Interested individuals should send (1) a cover letter, curriculum vitae and the names and contact information of three referees; (2) statement of research and of teaching interests and experience, list of publications and three recent research articles.

Applications will be accepted until the position is filled, with all applications received within 30 days of this posting being fully considered. Applications will be reviewed as they are received. Candidate interviews are expected to begin in October 2016.

McGill University is committed to diversity and equity in employment. It welcomes applications from: women, Aboriginal persons, persons with disabilities, ethnic minorities, persons of minority sexual orientation or gender identity, visible minorities, and others who may contribute to diversification. All qualified applicants are encouraged to apply; however, in accordance with Canadian immigration requirements, Canadians and permanent residents will be given priority.
