Multiple Research Opportunities

The Dartmouth Institute for Health Policy and Clinical Practice (TDI) is a dynamic force within Dartmouth College dedicated to improving health care. TDI has a rich history of health services and healthcare delivery science research – from our work on regional care variations to examining how payment reform models are being formed to implementing patient driven measures into clinical care. Our research portfolio is growing and several of our research teams are hiring. This is an opportunity for multiple analysts and programmers, at all levels, to join us in shaping the national conversation on health policy and services research.

Research teams work on a variety of cutting-edge health projects including implementing and evaluating population health initiatives, evaluating innovative payment reform efforts, implementing new models of health care delivery (e.g., accountable care organizations), evaluating and describing the landscape of health systems, and examining the use of evidence based care across and within systems. Analysts and programmers work with a team to develop and implement efficient processes to access and analyze complex, longitudinal healthcare data including Medicare, Medicaid, and commercial claims data and survey data using sophisticated techniques.

Specific skills include:

• SAS knowledge, including experience using SAS functions, SAS macros, and merging large datasets.
• Understanding of administrative claims data.
• Demonstrated data management expertise and statistical methodology expertise
• Understanding of statistical methodologies and advanced analytics, including the ability to identify and run appropriate statistical tests and models
• Understanding of health services research concepts and methods.

We anticipate hiring for multiple analyst positions across all levels.

All positions may be based in Lebanon, New Hampshire or Portland, Maine. Dartmouth College offers medical, dental and vision plans, retirement plan, paid time off, tuition reimbursement, fitness reimbursement, and the opportunity to live in a beautiful area with year-round recreational activities.
