Post-doctoral Research Professional
Booth School of Business at the University of Chicago

Institution: University of Chicago Booth School of Business

Position Title: Post-doctoral Research Professional in Statistics

Duties and Responsibilities: The Econometrics and Statistics group at the Booth School of Business of the University of Chicago invites applications for a Postdoctoral Research Professional. The postdoc will be working under the supervision of Dr. Veronika Rockova but will have ample opportunities to collaborate with other members of the group on multiple projects. The postdoc will be working on a range of problems involving statistical modeling, computing, as well as applications. More specific areas include, but are not limited to, Bayesian econometrics, dynamic models, regularization, high-dimensional computing, model selection, Bayesian optimization and causal inference. The postdoc will also have the opportunity to actively participate in the broad interdisciplinary environment at Booth.

Position Qualifications: The candidate should have a recent Ph.D. degree in statistics, econometrics, biostatistics, or a related area, should have interest in Bayesian data analysis and should be able to contribute to code development (such as C/C++).

Salary Range: Depends on Qualifications
