1. Go to the interactive graphic website on 'How Different Groups Voted in the 2008 Democratic Presidential Primaries' (link on course website).
   
   (a) Which group exhibited the largest differences among states?

   (b) How did voters in Massachusetts differ in their voting when grouped by level of education? Do you see a pattern?

   (c) In Connecticut, voters age 60 and over favored Obama by 2 percentage points. However, when the voters in Connecticut are grouped by income, only families earning more than $50,000 a year favored Obama. Can we conclude that all voters age 60 and over in Connecticut live in families that earn more than $50,000 a year? Explain.
