The Department of Biostatistics at Virginia Commonwealth University (VCU) is seeking a master’s level senior biostatistician to fill a research associate/instructor level faculty position. The candidate should have demonstrated experience working in and fostering a diverse faculty, staff, and student environment or commitment to do so as a faculty member at VCU. The candidate should be able to define technical problems in research projects and databases and to implement new or revised statistical approaches to alleviate the problems. The candidate should also be able to perform critical analyses of the literature relevant to ongoing or planned research projects and to prepare manuscripts for publication. Proficiency with statistical software including SAS, R and SPSS. Knowledge of statistical requirements in grant preparation. Ability to explain abstract statistical concepts to stakeholders with varying levels of statistical literacy. Ability to work independently on multiple projects with minimum supervision.

The VCU Department of Biostatistics consists of 20 full-time faculty and offers both M.S. and Ph.D. programs in biostatistics, including a concentration in genomic biostatistics and a M.S. in clinical research and biostatistics concentration. In addition to other computational resources at VCU, our department supports its own high-performance computing cluster.

**Qualifications:** Master’s degree in biostatistics. Excellent English language communication skills. Strong background in data analysis and working collaboratively in a biomedical research environment. Experience in maintaining databases, performing extraction, analysis and presentation of data using spreadsheets and graphical statistical packages. Familiar with organizing data searches, planning analytical approaches and preforming appropriate and informative analyses. At least two years of experience in a biomedical research environment.

All candidates should have demonstrated experience working in and fostering a diverse faculty, staff, and student environment or commitment to do so as a faculty member at VCU. Potential candidates can submit applications, including a statement of research, teaching philosophy, curriculum vitae and contact information for three professional references, via mail – to Mrs. Yvonne Hargrove, Department of Biostatistics, Virginia Commonwealth University, P. O. Box 980032, Richmond, VA 23298-0032 or by e-mail to yvonne.hargrove@vcuhealth.org.

Virginia Commonwealth University is an equal opportunity/affirmative action employer. Women, minorities and persons with disabilities are encouraged to apply.
