BIOSTATISTICIAN - RESEARCH INSTRUCTOR

The Department of Biostatistics and Informatics in the Colorado School of Public Health is hiring one or more masters trained faculty in its Center for Innovative Design and Analysis (CIDA). These positions are split between the Center for Innovative Design and Analysis (CIDA) consulting branch and a major collaborative research group. CIDA is a campus-wide analytics center charged with expanding the analytics expertise and research for the Anschutz Medical Campus.

This position will join 16 other faculty in CIDA and over two-dozen faculty and research personnel in the Department of Biostatistics and Informatics. Research instructors interact and collaborate with health researchers on their basic science, clinical, and health science research projects. The collaborative research groups for this position are broad encompassing data science, health outcomes, and ‘omics.

A research instructor is expected to provide high-level, professional and scientifically rigorous design and analysis support to biomedical researchers at CU Anschutz. A person in this position works with other biostatisticians and domain-specific researchers on the design and analytical aspects of the research process, including: design of new studies, structuring data collection systems, the application of state-of-the-art methodologies, analyses, and preparation of abstracts, oral and poster presentations, and scientific manuscripts.

Salary: Commensurate with experience, but typically starts at $72,000.
