The Institute for Health Metrics and Evaluation (IHME) has an internship opportunity for undergraduate students!

The Institute for Health Metrics and Evaluation (IHME) is an independent research center identifying the best strategies to build a healthier world. By measuring health, tracking program performance, finding ways to maximize health system impact, and developing innovative measurement systems, IHME provides a foundation for informed decision-making that ultimately will lead to better health for people worldwide.

The IHME Internship is a structured program in which undergraduates can receive professional experience as well as education and training opportunities to enhance career readiness. This internship provides a unique opportunity for undergraduates to work in a dynamic and agile organization at the intersection of nonprofit work, technology development, academia, and research. Interns will have the opportunity to contribute to mission-critical work, learn from experts in the field, and interact with diverse and international staff.

IHME will offer internships in the following areas:
1. Research
2. Global Engagement
3. Technology
4. Financial Planning

Each track will provide a unique and customized experience where individuals have the opportunity to explore a specific professional domain, participate in collaborative projects, receive mentorship from experts, and learn a new set of skills and knowledge. Interns get hands-on opportunities to work on projects that are mission-critical to the success of our research and expansion of our organization. The IHME internship program is designed as an experiential learning opportunity intended to enhance personal growth, career development, and academic achievement.
