ABOUT THE POSITION
Applications are invited for a full-time Data Analyst in the Center for Outcomes Research (COR) at JPS Health Network. The COR comprises biostatisticians and epidemiologists involved in research pertaining to vulnerable populations (e.g. racial/ethnic minorities, socioeconomically disadvantaged, etc.). The overarching themes include outcomes, health disparities, and dissemination and implementation. Topical areas for these themes include cancer, diabetes, infectious diseases, and maternal and child health.

Key duties for the Data Analyst position include:
1. Identifying analytic approaches for experimental, quasi-experimental, and observational study designs.
2. Preparing data for analysis and maintaining databases.
3. Implementing statistical analysis plans and generating results.
4. Preparing detailed descriptions of analyses and findings for funding proposals and manuscripts.
5. Actively seeking new knowledge of methods for data management and analysis.

ABOUT THE INSTITUTION
JPS Health Network is a publicly-funded healthcare system in Fort Worth, TX that has supported healthier lives for more than a century. The health network comprises a 573-bed academic hospital and more than 40 satellite and school-based health centers. The network’s more than 6,500 team members deliver high-quality and compassionate care for more than 1.2 million patient encounters annually.

HOW TO APPLY
Applicants are required to have graduate training (MS, MPH, MA) in biostatistics or a related quantitative field and must be a United States citizen or permanent resident. The anticipated start date is negotiable, but the position is available immediately. Please send a cover letter, curriculum vitae, and contact information for 3 professional references to: jpscor@jpshealth.org.
