Yale University offers exciting opportunities for achievement and growth in New Haven, Connecticut. Conveniently located between Boston and New York, New Haven is the creative capital of Connecticut with cultural resources that include three major museums, a critically-acclaimed repertory theater, state-of-the-art concert hall, and world-renowned schools of Architecture, Art, Drama, and Music.

General Purpose:
The Biostatistician will work within the new Center for Methods of Implementation and Prevention Science (CMIPS) and will provide comprehensive data management and analysis support for new and ongoing studies in HIV/AIDS, nutrition, environmental health, global health, and statistical methods development. S/he will work with epidemiologic and medical researchers and senior biostatisticians to derive variables in SAS, clean data, perform analyses on large datasets, and produce tables, graphs in publication-quality form for manuscripts, reports and presentations. Duties will also include training and assisting other team members and students in the use of the analysis systems and datasets, program reviewing for analysis conducted by other team members, interpreting the analysis results, and providing statistical support for grant applications. The primary work site is in New Haven, and some international travel may be optional. Two years of full-time experience with clinical trials and/or epidemiologic research, categorical, survival and longitudinal data is required.

Required Education and Experience:
Master’s Degree in Biostatistics, Statistics or relevant field. Two years of experience; or equivalent combination of education and experience.

Qualifications:
- Skilled with using SAS statistical software required, including the SAS macro language.
- Ability to be independent and self-motivated.
- Excellent oral and written communication skills in English are essential.
- Preferred Education and Experience: Experience with SPSS, R, Fortan or C++, and Access data management software a plus.
