

Postdoctoral Research Fellow/Research Associate Position in Quantitative Sciences for Cancer Research

Description:

The Department of Biostatistics at the Harvard T.H Chan School of Public Health invites applications for a Postdoctoral fellow position funded in large part by an NIH training grant on Quantitative Sciences for Cancer Research. Candidates have latitude to choose among several mentors across various institutes at Harvard; research can range from the most applied to the most theoretical as long as there is a genuine commitment to its ultimate utility in cancer research.

Basic Qualifications:

The ideal candidate is an independent, solution-oriented thinker with a strong quantitative background and a clear commitment to cancer research. Other qualifications include:

- Required: PhD in Statistics, Biostatistics, Computer Science, Data Science, or related field
- Required: U.S. Citizenship or Permanent Residency
- Preferred: Interest in developing open-source software, reproducibility.
- Preferred: Familiarity with multiple data science tools and ability to learn new tools as required.
- Preferred: Excellent communication and writing skills.

Application Procedures:

To apply for this position, submit your application through the Harvard ARIeS: Academic Recruiting Information eSystem at the following link:
