

Job Title:**Postdoctoral Research Fellow****Fred Hutchinson Cancer Research Center, Seattle**

Fred Hutchinson Cancer Research Center (FHCRC), home of three Nobel laureates, is an independent, nonprofit research institution dedicated to the development and advancement of biomedical research to eliminate cancer and other potentially fatal diseases. The FHCRC is located in Seattle, and provides a highly interactive and supportive environment for junior investigators to grow and develop their future career. The FHCRC has been consistently ranked as one of the top places to work for postdocs.

Duties and Responsibilities

The fellow will be developing statistical methodology to tackle forefront research problems in high-dimensional genomics and onco-data science. Many challenges exist for analyzing these new types of data, providing exciting opportunities for the development of novel statistical methods. The research questions are directly motivated from cutting-edge projects funded by NIH, ensuring that the work will be highly impactful. Besides conducting methodology work, the fellow will also have the opportunity to collaborate with top scientists at the Fred Hutchinson Cancer Research Center and build research network across the country.

Position Qualifications

Ph.D. or equivalent in Statistics, Biostatistics or in a similar quantitative field. Solid training in statistical theory and applications. Excellent written and oral communication skills. Strong computing skills.
