The Statistics Department at UC Irvine has a full-time position available for a Postdoctoral Scholar. This position requires a Ph.D. degree in statistics, computer science (machine learning), or mathematics. The position entails performing research in the area of Bayesian analysis, stochastic process modeling, statistical machine learning, computational statistics, and statistical methods in neuroscience. The research involves developing computationally efficient statistical models for neural data analysis.

The appointment is for one year initially (with flexible starting date) and can be extended. The salary for this position begins at $50,760 but is also contingent on knowledge and experience. The position is dependent upon extramural funding.

Interested applicants should respond by submitting a cover memo, curriculum vitae, and the names and addresses of three references at: https://recruit.ap.uci.edu/JPF05332
Applicants should respond no later than 9/1/2019.

The University of California, Irvine is an Equal Opportunity/Affirmative Action Employer advancing inclusive excellence.
