Faculty-Level Biostatistician, Department of Epidemiology and Biostatistics
Memorial Sloan Kettering Cancer Center

Memorial Sloan Kettering Cancer Center (MSK) is one of the world’s premier cancer centers, committed to exceptional patient care, leading-edge research, and superb educational programs. The blending of research with patient care is at the heart of everything we do. The institution is a comprehensive cancer center whose purposes are the treatment and control of cancer, the advancement of biomedical knowledge through laboratory and clinical research, and the training of scientists, physicians and other health care workers.

The Department of Epidemiology and Biostatistics, a group made up of 35 biostatisticians (17 faculty, 18 research staff), is seeking a highly motivated and successful individual to join them at the doctoral level.

Department members engage in collaborative research with investigators studying the full spectrum of problems in cancer research, and pursue their independent research interests. The current interests of the faculty include methodology for the design and analysis of clinical trials, epidemiologic studies, genomics, statistical genetics, diagnostic test evaluations, survival analysis, computer intensive methods, hierarchical modeling, and Bayesian techniques.

The ideal candidate should have:

- A strong commitment to statistical collaborations with medical or basic science investigators
- Excellent communication skills
- An interest in pursuing independent methodological research

Please send CV, a letter outlining your interest, and names/contact information of three references via email to:

Samantha Vasquez
Assistant to the Chair, Department of Epidemiology and Biostatistics
