The Department of Biostatistics at the NYU College of Global Public Health is seeking candidates with a PhD in Statistics/Biostatistics for a postdoctoral position under the mentorship and direction of Prof. Rebecca Betensky. The position involves the development of methodology for the design and analysis of studies involving complex survival data. The postdoctoral fellow will also engage in some collaborative research in Alzheimer’s disease and other applications and may participate in some teaching if desired.

Position Qualifications: Ph.D. in Biostatistics or Statistics

Please submit the following materials to: https://apply.interfolio.com/63569

CV
3 letters of recommendation
1-2 research papers
