The Statistics Department at UC Irvine has a full-time position available for a Postdoctoral Scholar. This position requires a Ph.D. degree in statistics or related fields. The position entails performing research in the area of Bayesian analysis, stochastic process modeling, statistical machine learning, and computational statistics. The research involves developing computationally efficient Gaussian process models for neural data analysis.

The appointment starting in fall of 2018 is for one year initially, but can be extended. The salary for this position will be contingent on knowledge and experience. The position is dependent upon extramural funding.

Interested applicants should respond by submitting a cover memo, outlining your skills and relevant experience, curriculum vitae, and the names and addresses of three references at: https://recruit.ap.uci.edu/apply/JPF04537
Applicants should respond no later than 6/1/2018.

The University of California, Irvine is an Equal Opportunity/Affirmative Action Employer advancing inclusive excellence. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability, age, protected veteran status, or other protected categories covered by the UC nondiscrimination policy.
